

DATASHEET

What's New in Sage 300 2022

Work seamlessly with a single shared set of company data.

Sage 300 2022.0 offers users exciting new features that guarantee increased flexibility and compatibility needed for today's business. The latest version presents additional functionalities and superior user experience through Web Screen Improvements, Desktop Screen Improvements, and some Capability Enhancements.

Benefits of Sage 300 2022.0	
Better User Experience	Advanced Capabilities & Flexibility
Greater productivity	Improve efficiency
Less training/retraining	Gain better business insight
Higher employee satisfaction	Less workarounds/ manual processes

What's new in 2022.0

Released August 2021

New Web Screens

We have added several new web screens for Sage 300 subscription customers to increase the utility of web screens on our quest to achieve parity with desktop screens.

General Ledger: GL Chart of Accounts

Accounts Receivable: AR Customer List

Project and Job Costing - Transaction Screens for Opening Balance, Costs, Material Usage, Material Returns, Material Allocation, Post Transactions and Print Transaction Listing

Common Services: Reminder List

Redesigned Finder to Align with Desktop Functionality

The new Finder has usability improvements and the addition of persistent filtering that would help users set default search options.

Filtering option now is set to "Show all records" so users can view previous and next records by default. Additional filtering options, now make highlighting first and last record easier.

General Ledger Financial Reporter now compatible with either 32 or 64-Bit Microsoft Excel

The 64-bit Financial Reporter provides improved compatibility with several business software.

Users now have seamlessly use General Ledger Financial Reporter with either 32 or 64-Bit Microsoft Excel.

Purchase Order Improvements

Users now can mass update the Location or Arrival Date in Purchase Order detail lines as well as enter negative additional costs on purchase order credit notes.

Order Entry Improvements

Users now can mass update the Location or Expected Ship Date in Order detail lines.

Reserve LanPak User Licenses

Users can now reserve one or several LanPak user licenses for a user or any 3rd party product. LanPak license provides specific users uninterrupted access to Sage 300.

Accessing Sage Data & Analytics

There are now new options to start Sage Data & Analytics from within Sage 300.

In desktop screens, it can be accessed by clicking on Sage Data & Analytics icon on the desktop ribbon. In web screens, it can now be opened from Business Intelligence Reporting on the navigation menu

Enhanced 3rd Party Help

3rd party applications can now link and drop their content in Sage 300 help menu that enables users to find the information and resources needed to use these 3rd party applications with Sage 300.
